Commissioners:

Government should foster competition in the interest of maintaining a vibrant economy in this country. Thwarting progress is anti-competitive, anti-consumer and goes against the mission of the FCC as facilitators not obstructionists.

I would urge you to allow satellite radio to compete in all markets and may the best business model win. God bless the NAB and their formidable army of lobbyists. But if their time has passed, let consumer preference be the judge.

Thank you,

Chris Farrell
